

## **Water Conservation Community Notice**

Residents of Upper Island Cove,

Please be aware that due to overly dry weather conditions in the region, we are issuing this notice asking all residents to minimize their non-essential water usage.

Ways you can help:

- Please consider watering your lawns or gardens with the use of a hand held nozzle and refrain from using unattended water sources such as sprinklers.
- If you do water your gardens, please choose to do so before 10am or after 7pm.
- Refrain from high water use activities such as washing cars or filling a pool.
- Be aware of your water usage at home and limit the number of water intensive processes like laundry machines and dishwashers by waiting until a full load is ready for washing.

Your cooperation is important to ensure we all have access to water for essential needs.

Thank you for your continued diligence,

The Town of Upper Island Cove
